<h3>Floor Cleaning</h3> <ol style="list-style-type: none"> Preparation [Bucket Application] Dispense premixed Uni9 Hard Surface & Floor Cleaner Solution via dispenser to required level (if dispensing manually, add 2 doses of Uni9 Hard Surface & Floor Cleaner concentrate per 4 litres of water) into a YELLOW Bucket. Pre-Clean Floor Sweep floor area with a soft brush or vacuum to pre-clean and remove all visible soiling. If required, agitate surface to help remove stubborn soil. Clean Floor Apply Uni9 Hard Surface & Floor Cleaner Solution to floor area and allow contact time. Rinse Rinse with clean water and remove as much excess water on surface as possible. Use a floor squeegee if required. 	<h3>Surface Cleaning</h3> <ol style="list-style-type: none"> Preparation [Spray Application] Dispense premixed Uni9 Hard Surface & Floor Cleaner Solution via dispenser to the required level (if dispensing manually add 1 dose of Uni9 Hard Surface & Floor Cleaner concentrate with 500ml of water) into a trigger bottle. Pre-Clean Surface Spray all the surfaces with Uni9 Hard Surface & Floor Cleaner Solution, wipe surface clean and remove all visible soiling. If required agitate surface to help remove stubborn soil. Sanitise Surface Apply either the Medi9 RTU Spray or Medi9 Wipes to all surfaces; trolley, stretcher, chairs, and all equipment including medical devices. Allow to air dry. 	<h3>Infectious Disease Deep Clean</h3> <p><small>[Advice/Recommendation: Use of FFP3 face mask in addition to recommended PPE when carrying out high level disinfection processes.]</small></p> <ol style="list-style-type: none"> Preparation Clean interior as per floor and surface recommendations. Sanitise Area High level disinfect with Medi9 RTU Spray and wipe all surfaces, medical devices, and equipment paying special attention to all touch points. Cleaning Process Fog interior of vehicle using the Medi9 Air Sanitisation Machine. Ensure a fine mist covers all areas, not necessary to soak surfaces. Allow vehicle to vent and air dry for 30 mins before re-occupation (typical fogging process should take no longer than 3 mins). Safety Check Air Sanitisation Machine Store Air Sanitisation machine horizontally. If in regular use, the remaining chemical can be left in the tank for 3-4 days. Wipe down Air Sanitisation Machine and flush machine with Medi9 Air Sanitisation Solution every 4 weeks.

<h3>Manual Cleaning</h3> <ol style="list-style-type: none"> Personal Protection Ensure you are wearing the appropriate protective equipment for prolonged use of chemicals. Preparation Dispense premixed Uni9 Traffic Film Remover (TFR) solution via dispenser to the required level (if dispensing manually add 4 doses of Uni9 TFR concentrate per 4 litres of water) to a bucket. Pre-Clean Pre-clean surface and rinse off any large build-up of mud and dirt from the vehicle exterior. Clean Apply Uni9 TFR to vehicle exterior from the bottom of the vehicle working up and allow contact time. Do not allow solution to dry. Scrub Using a wash brush, agitate surface to help remove stubborn soil. Rinse Rinse vehicle exterior with clean water from the top, working down and allow to air dry. 	<h3>Pressure Wash Cleaning</h3> <ol style="list-style-type: none"> Personal Protection Ensure you are wearing the appropriate protective equipment for prolonged use of chemicals. Preparation Insert chemical dip tube from pressure washer into bottle of Uni9 TFR, pressure washer will automatically dose chemical. Alternatively fill chemical tank. Pre-Clean Pre-rinse vehicle removing remaining large build up of mud and dirt from exterior of vehicle. Clean Activate chemical additive on pressure washer. Apply Uni9 TFR to vehicle exterior from the bottom of the vehicle working up and allow contact time. Do not allow solution to dry. Scrub If necessary scrub with wash brush to remove any stubborn soiling. Rinse Disable chemical additive on pressure washer, rinse vehicle exterior with clean water from the top, working down and allow to air dry.

The 10 Golden Rules
For the Control of Substances Hazardous to Health (COSHH)

1. Always read the label and follow the instructions for use.
2. Never mix chemicals. **MAKING CHEMICALS CAN KILL!**
3. Always use protective equipment provided.
4. Never put chemicals into containers with other uses, such as eating and drinking vessels.
5. Always store chemicals safely, away from food, drink, and away from locked locations.
6. Never put chemicals into unlabelled containers.
7. Give the first aid treatment required if you accidentally spill chemicals on yourself or others.
8. Always report any faulty equipment, spillage or damaged containers to your supervisor.
9. Develop safe working practice around the workplace and always follow the rules.
10. If you find anything wrong, report it to your supervisor.
