## About Us

We are founded on the belief that life matters and that there are always ways to make life better. Every day, everywhere, we strive to meet this aim by making a positive difference to people's lives.

At Nine Group, we aim to be a beacon and make an impact at scale. From the outset, we harness our diverse skills and in collaboration with our customers and experts relentlessly look to expand what is possible, effective and can be clinically proven, when it comes to infection control and management.

From inception to delivery we are committed to delivering the most progressive and valuable solutions, in a way and at a time that our customers want, underpinned by simple and clear facts so our people can make informed decisions.

# How We Work

The process which sets us apart & forms great, long lasting, partnerships with our clients.

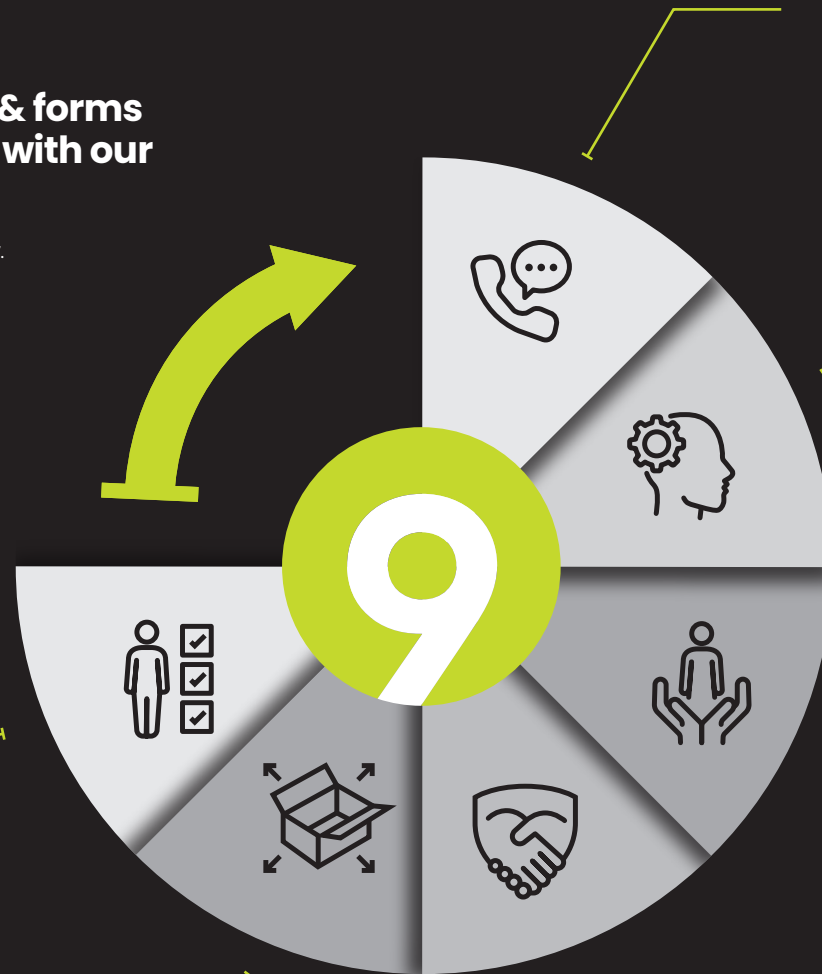

See pages 12&13 for Our Four Pillar Partnership Methodology.

## Follow Up:

We are obsessed with follow up, to constantly get feedback and ensure your 110% satisfied with the service and care your receiving. Regularly keeping in touch ensures we can help and support with any new challenges or problems which may arise.

## Delivery:

Your order is delivered fast, using sustainable packaging options. For example, using our recycled plastic, re-usable totes reduces the amount of cardboard you have to discard and we have to use as an organisation. Our own delivery vehicles have advanced tracking systems, so you know where your order is at any given time and provides a detailed POD upon delivery.

## Contact

Contact with our clients is either made proactively or reactively. We want to see how we can help make making your day-to-day life easier, by solving problems & challenges.

## Understanding Our Clients:

We like to fully understand your requirements in detail and discuss your challenges to offer tailored solutions providing as much value to you as possible. We are not just another supplier; we like to form long lasting partnerships.

## Supporting Clients:

Supporting you in every way to provide a great solution or solve a problem is what drives us each day to make a difference and set us apart.

## Order Placed:

Once orders are placed, your client care executive, goes above and beyond to ensure this is processed, picked, packed and dispatched as quickly and efficiently as possible.

## NineGrp / Key Services

# Our Four Pillar Partnership Methodology

**Pillars are the support that holds up any building, but they are also the support that holds up a company. Like with construction, the pillars of a company must be strong, effective, and beneficial to every aspect of the business.**

**We at Nine Group have identified four pillars that we believe are the most important and vital in supporting your company and services. They are innovative products, sustainability, logistics/operations, and an all-in-one solution.**

### – Innovative Products

We supply and manufacture a wide range of products through a variety of categories and are always looking for what is new, updated, and innovative to help our clients be more efficient in what they do, add value, and bring about cost savings where possible.

### – Sustainability

Companies around the globe are making moves to become more sustainable, and Nine Group are no exception. We have policies and plans in place to become more sustainable in all aspects of the company, which includes fully electrical vehicles as part of our delivery fleet, paper-free offices, and fully recyclable packaging/products where possible.

We have implemented a reusable tote service, which has made amazing progress in reducing the amount of cardboard that requires disposal. The totes are made with 100% recycled plastic and are used in conjunction with our fleet of delivery vehicles, which in turn reduce the number of deliveries a client receives.

### – Logistics/Operations

Nine Group offer a service to handle all logistics and operations for clients who have large requirements to carry out their day to day services. This reduces our clients' stress of background responsibilities and allows them to focus more on their business while we take care of the rest.

Using robust, reliable supply chains, clients will receive the products when required, on our fleet of vehicles to ensure the product is delivered every time and in good condition.

### – All-In-One Solution

Along with our Medi9 range being an all-in-one infection control solution, Nine Group itself is, in fact, the same.

We are dedicated to providing everything needed in terms of medical consumables, equipment, infection control, decontamination systems, furniture, PPE, cleaning, janitorial and patient care to name a few.

Along with being more sustainable, and all in one solution saves you time and money through eliminating the need for multiple suppliers and deliveries.

NineGrp / Key Services

# Logistics / Tracking

Track POD is a fully automated system which all drivers are trained on and provides a fully detailed Proof of Delivery document to both us and our clients.

Features:

- Our clients' order reference number
- Quantity of Packages
- All line items that are in the delivery
- Weight of delivery
- Name of driver
- Time and date of delivery
- Photo proof of delivery
- Name and signature of signatory
- Delivery vehicle registration

This has already been extremely beneficial to all clients that have used our service, and we have received great feedback, especially as our new system allows our clients to provide key codes for driver access out of hours. Then, by providing our photo proof of delivery, you can see that your order has been delivered accurately and safely.

We are looking to further advance this system by allowing clients to log in to the system from their end and track our vehicles within the hour of delivery, so the delivery is entirely trackable for both us and our clients.

We decided to implement this system for a number of reasons, but mainly using feedback from our platinum clients after asking how we could improve to make the delivery process easier for them. Also, in our bid to become more sustainable, the system allows us to take a further step to becoming a paperless company, something we are working towards in the next 5 years.

With the Track POD system, our Logistics team now have full control over the route planning of each delivery vehicle within our fleet. This, again, enables us to plan the routes more efficiently to help in sustainability. Our drivers are directly employed by Nine Group enabling us to carry out various required checks to guarantee great client care.

The proof of delivery document is sent to both the client and us in PDF form via email, which is, like most of our systems, customisable to the client's needs and requirements.

If you would like to learn more about how this system can add value to your organisation, please scan the qr code or email us on sales@ninegrp.com and one of our logistics executives will happily discuss your needs.

## NineGrp / Key Services

# Our Sustainable Packaging

**Another step forward to becoming more Sustainable and reducing our carbon footprint.**

**We at Nine Group have made it a goal for the next coming years to reduce our carbon footprint as much as possible by looking at innovation of products, packing and the way we deliver our goods to our clients.**

With the knowledge that 7 million tonnes of cardboard is wasted to landfill in the UK every year, Nine Group made the decision to try and change the way in which we deliver goods and services.

To reduce our impact towards this statistic, we have recently introduced and are currently rolling out the use of reusable plastic totes for delivery of goods.

These totes are made from recycled plastic and are able to reduce our use of cardboard boxes by an astonishing figure. Our clients receive their items in the totes on our fleet and keep them until we return with another order or collect when next passing. The totes are then brought back to our head office to be cleaned and sanitised before being used again.

Not only does this new system allow us to be more sustainable, but it allows our clients to be as well, reducing the waste of cardboard and therefore carbon emissions needed to remove said waste from their facility.

So far, this system has not only improved our sustainability, but has made the picking and packing of products more efficient, meaning our clients get their goods even faster, as warehouse staff no longer need to assemble, package, and secure the cardboard boxes, but simply pack the items into the reusable boxes and seal the lid.

We are looking to roll this system out to more of our clients as Nine Group expands and evolves. Nine Group is very conscious of our impact on the environment and are constantly looking for ways to help reduce carbon footprints with both our own company and our clients.

— The totes both delivery and clinical waste are fully washed and processed through our decontamination chamber before re-use.

For more information or if you'd like to start using our Tote boxes, scan our QR code...

# Make Ready / IPC Areas

The complete in-house service for transforming your work place area's into a safe, bespoke designed and built Make Ready / IPC Areas.

**Features:**

- Making sure everything you require is in one safe place
- Customisable to your requirements
- Wall Artwork / Signage
- Fully plumbed & ready to go
- Storage systems
- Fully Equipped & Stocked

**From Survey:**

This initial step can be done by either sending us the dimensions using our Survey form, along with additional photographs of the area or by site visit to your premises and carrying out a site survey.

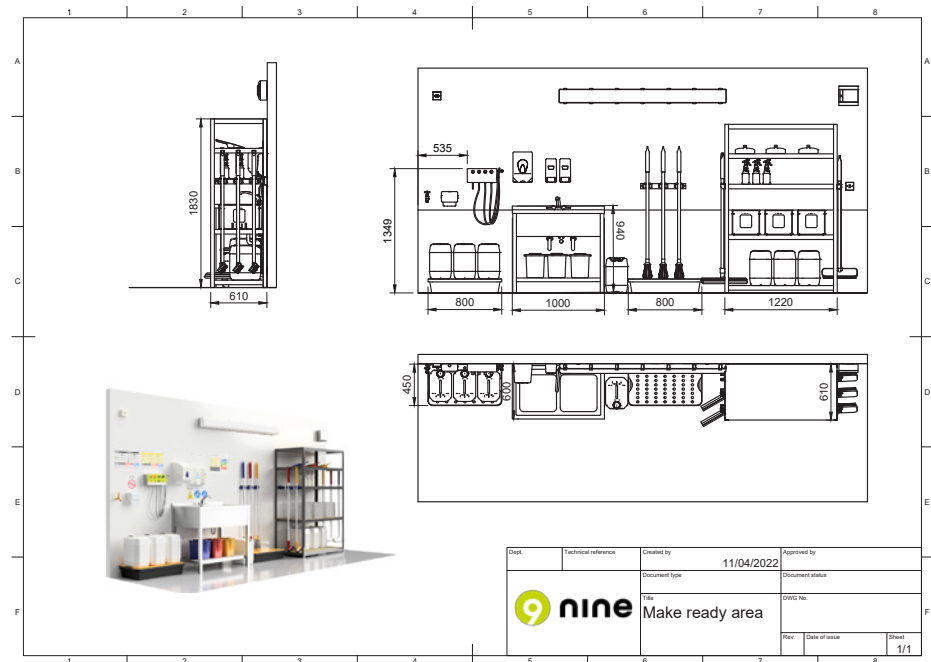

**The visual:**

Once the dimensions / site survey is complete and we have discussed what your requirements are, we will produce a full CAD design and rendering showing you your new Make Ready / IPC Area. At this point you will be able to make alterations to the design.

**Reality:**

Once the CAD design / rendering, equipment & wall artwork have all been approved and signed off, our team will then transform the specified area into your new Make Ready / IPC Area.

**Scan and chat with us to find out more...**

## NineGrp / Key Services

# All-In-One Complete Kit [AIO]

**Our easy kit offers one complete delivery of everything required to kit-out ambulance, emergency service vehicles and mobile health clinics**

### Features:

- **All-in-one package that eliminates the need for multiple suppliers or deliveries.**
- **Each kit is completely bespoke and customisable to exact quantity and vehicle requirements.**
- **Provides ease of use with one single delivery, which can be specifically labelled for each vehicle.**
- **Infection control, equipment, PPE and consumables all in one, easy to use package.**
- **Multiple sizes available for all items.**
- **Delivery briefly prior, to new vehicle arrival.**

**While working with various emergency services, Nine Group have identified one of the biggest pressures the sector experience in regard to procurement of infection control, equipment and, most importantly, consumables.**

We have discovered, from extensive discussions with executives within the sectors, procurement/make-ready teams struggle to obtain the large variety of vital products from multiple suppliers that they require. Issues that accompanied that were different delivery dates of stock, stockholding

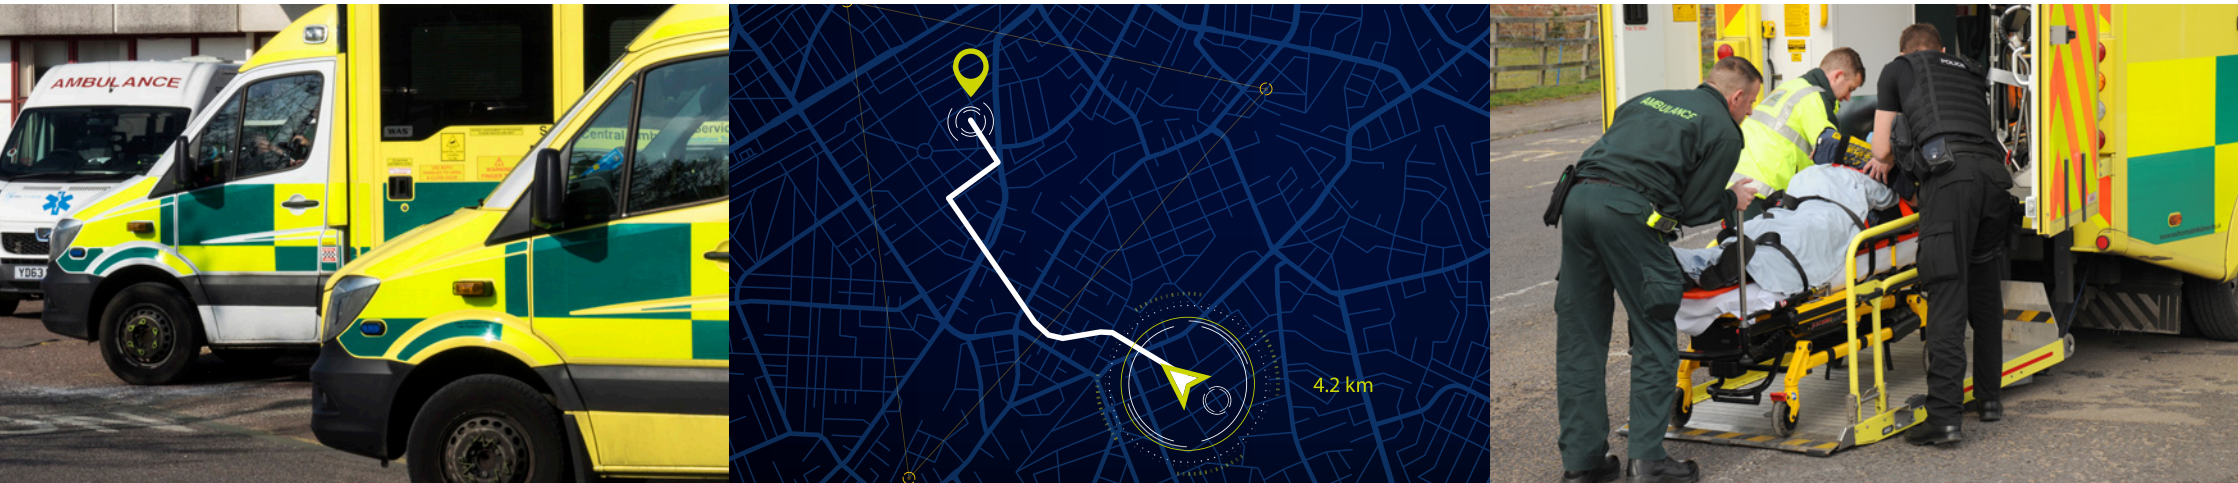

abilities, and confusing correspondence between the different suppliers.

The All-In-One Complete Kit is specially designed to reduce or even eliminate the problems with procurement, and provides all infection control products, consumables, equipment, and furniture needed to completely fit out an emergency vehicle in one simple delivery, from one supplier.

Each kit is entirely customisable to our client's standards and requirements, and even has the option to be labelled with each vehicle's details (e.g. vehicle registration) to further assist make ready teams when kitting out multiple vehicles at once. If this is for a new fleet of vehicles, delivery can also be staggered to work within your vehicle roll out.

While being the complete package in terms of products, the AIO kit greatly reduces the amount of stockholding that an emergency service needs to have, as the kits can be delivered on a specific date when the vehicle is due to be delivered & made ready, and instead of having a large quantity of stock to pick from, each cupboard/compartments of the vehicle will be packaged/labelled, making it a grab-and-go solution.

These kits provide a wide range of benefits and added value to any ambulance service in terms of huge time and cost savings throughout many departments. Not only does the all-in-one kit offer administrative savings by only requiring one order, but wide savings from a make ready aspect.

All-In-One Complete Kit *Continued.*

## How it works:

### Step 1:

We start with a briefing call to determine specific needs, such as the number of vehicles needed, timescales of products/ vehicles, delivery time preferences, etc. The call includes a discussion regarding the type of vehicles and the types of products that are required.

### Step 2:

Following the briefing call we require the load lists for the vehicles, in order to confirm the exact volume of each product that is needed for the primary order, including specific brand or supplier preferences and approved alternatives.

### Step 3:

Upon receipt of the load lists, we provide a quote for all equipment and consumables, or just consumables if you wish to source the equipment by alternative means.

### Step 4:

Everything is delivered at the same time, in one package, eliminating the stress of different delivery days for different products and the delivery and storage of multiple products, which can become difficult to keep track of.

### Step 5:

There are labelling options that will aid delivery even further, if preferred. One popular option is to label the pallets, which are also offered to aid delivery, with the number plates of the intended vehicles.

### Step 6:

Goods and products are then delivered, in general, a couple of days before the new vehicle arrives at the specified location. This can be sooner or later based on your preference, however it enables a slick and efficient transaction and eliminates the problem of storing goods at base for an extended period. It means you simply unbox the pallets and load the vehicle ready for its first shift. If preferred, we can bag or box items together for specific lockers/cupboards, if you provide a locker lay out/map with details of what they store in each locker/cupboard of the vehicle, making the unpacking process most efficient.

# Additional Services

**We pride ourselves in making a positive difference to people's lives. From inception to delivery we are committed to delivering the most progressive and valuable solutions to you the customer.**

### 24/7 In-House Nine Group Delivery Service

We have expanded our in-house delivery team and fleet to enable a 24/7 direct, fast, and secure delivery service to mobile and static sites with our own vehicles and drivers for our platinum customers.

### Site Audits

We offer site audits and consultations to help our clients achieve and maintain clean and healthy environments in the most effective way.

### Trials and Testing

All our products have been extensively tested and we have a significant trial and testing data, which are available upon request. We appreciate that at times you may want to conduct your own testing and trials and we collaborate with our customers to facilitate their own in-house testing, if and when desired.

### Product Development

In collaboration with our customers and experts, we relentlessly look to expand what is possible, effective, and can be clinically proven, when it comes to infection control and management. We are analytical and constantly ask ourselves is there something new or better, which would considerably improve today's options and work extensively with our clients on product development.

### Base / Healthcare Establishment in a Box

Our easy All-In-One Complete Kit offers one complete delivery of everything required to kit-out a space, whether it is a new medical room, a clinic, a mobile base upgrade or simply a complete restock.

### Service and Maintenance

We set high standards and all our equipment comes with a standard 12-month warranty. In addition, we offer service and warranty extensions as well as packaged, ad-hoc and emergency services. Our in-house team of technicians and engineers do this 24hrs, 7 days a week, 365 days a year.

### Stock Holding

We have significant in-house stock holding capabilities at our Head office to allow for rapid dispatch of critical items on behalf of our main clients and also offer additional flexible ad-hoc local warehouse and stock holding options and services at client sites.

### Product Training

We provide online, virtual and in person product training to run through choices and best practice principles.

### **Our Products**

At Nine Group we believe that there are always ways of improving life. This belief is carried by our staff every day as we strive to make people's life quality the best it can be.

This means we are always looking to expand what is possible, effective, and can be clinically proven in the areas of infection control and management.

We continue to expand the range products to suit and fit our clients requirements and have continued to work closely with them to manufacture the products they need while not short cutting on the technology.

F4701015

**Quantity**

Each

**Features:**

- Leaves no residue marks
- Easy to Tear, no scissors required
- Designed & manufactured for the NHS for HPV operations
- Advanced innovative channel seal that lock-in specialist adhesive

**Nine Group HPV Tape is uniquely designed to meet the needs of professional users. The tape has a specialist adhesive which is designed to remove cleanly from internal hard and soft surfaces. Our tape is designed for critical environment adhesion level but good cohesive strength, leaves no residue and is resistant to acids and other chemicals.**

NG-HPV Tape is ROHS certified and meets COSH regulations. The tape is manufactured with an embossed pattern which has the benefit of NO marks being left by this technologically advanced product, and tears straight.

NG-HPV tape has been designed from a specialist flexible Polyvinyl chloride, also known as poly vinyl or vinyl, commonly abbreviated PVC and does not have any ability to breath, this allows the product to be used in critical applications against water or vapour ingress.

DE908030  
ME901012

**Product**

Equipment  
Solution

**Features:**

- Large capacity B 16L, covers up to 20000m<sup>2</sup>
- Recharge Auto charging
- Intelligent obstacle avoidance with 2 intelligent patrol modes
- Precise disinfection 360° Sterilization rate >99.99%
- Simple Operation Easy to use by app
- Applicable to multiple scenarios

**The NG-Maxi Robot is equipped with autonomous navigation and automatic re-charge, smart obstacle avoidance, and 360 no dead angle coverage. It is designed to purify and disinfect the area through the rapid atomization of chemicals.**

It is controlled through a mobile app, which is easy to use and offers real-time monitoring, minimalizing any unnecessary exposure to chemicals.

The NG-Maxi is widely applicable to hospitals, airports, office buildings, shopping malls, schools, factories, and other public places.

### What is Medi9?

Medi9 is a revolutionary range of infection control products that provide alcohol and chlorine free hand and surface germ protection solutions. Our entire range is tested independently, and proven effective against bacteria, spores, viruses, and fungi upon contact, including Clostridium Difficile, MRSA, Norovirus, Swine Flu and Coronavirus.

Medi9 is used in multiple healthcare facilities, including NHS trusts, ambulance services, schools, and commercial sectors.

It is a unique, highly effective solution to sanitisation without the introduction of harsh chemicals such as alcohol or chlorine. Nine Group produce a large range of products in the Medi9 portfolio to ensure complete coverage of any infection control requirement.

Medi9 provides piece of mind. It comes ready to use (RTU), so you can simply grab and go and this minimises human error. Clinically proven results. Every time. Everywhere.

We are constantly researching and developing new environmentally innovative products for the Medi9 range.

Medi9 products are manufacture in the UK, allowing us to reduce our carbon foot print and maintaining high quality products.

### How effective is it?

Medi9 is a 'Beyond the Quat' fourth generation biocide technology which works by physically damaging the bacteria or cell. It consists of a polymer and biocidal agent that helps it penetrate and deactivate viral cells.

## Backpack Sanitisation Unit

Product codes	Product
ME908012	Equipment
ME901012	Solution

**Features:**

- Unique automatic air pressure control system ensures the fluid does not leak from spray head during use.
- Quick & simple to operate; minimal training required.
- Compact and lightweight.
- As it is a portable unit you can adjust the angle of spray to ensure total coverage of the area - even places that are difficult to reach.

The Medi9 backpack battery operated sanitiser unit has been specifically designed by Nine Group for speed of use in areas where mains power is not available. The unit can be carried to any area that requires high level disinfection using Medi9 sanitiser solution.

This Medi9 backpack battery operated unit can be used in a range of different environments - spanning from small areas to large and even outdoor areas.

It is powerful and very effective tool to prevent infections and the spread of bacteria and viruses. It is a truly unique sanitisation solution. It is suitable for use in a wide range of environments.\*

\*Hospitals, health centres, medical clinics, doctor surgeries, dentists, veterinary surgeries, nursing homes, schools, offices, vehicles (including ambulances), public transport, gyms, hospitality etc.

## Ambulance Sanitisation System

### Product codes

ME908020  
ME901014  
ME901012

### Quantity

1 x System  
20L  
5L

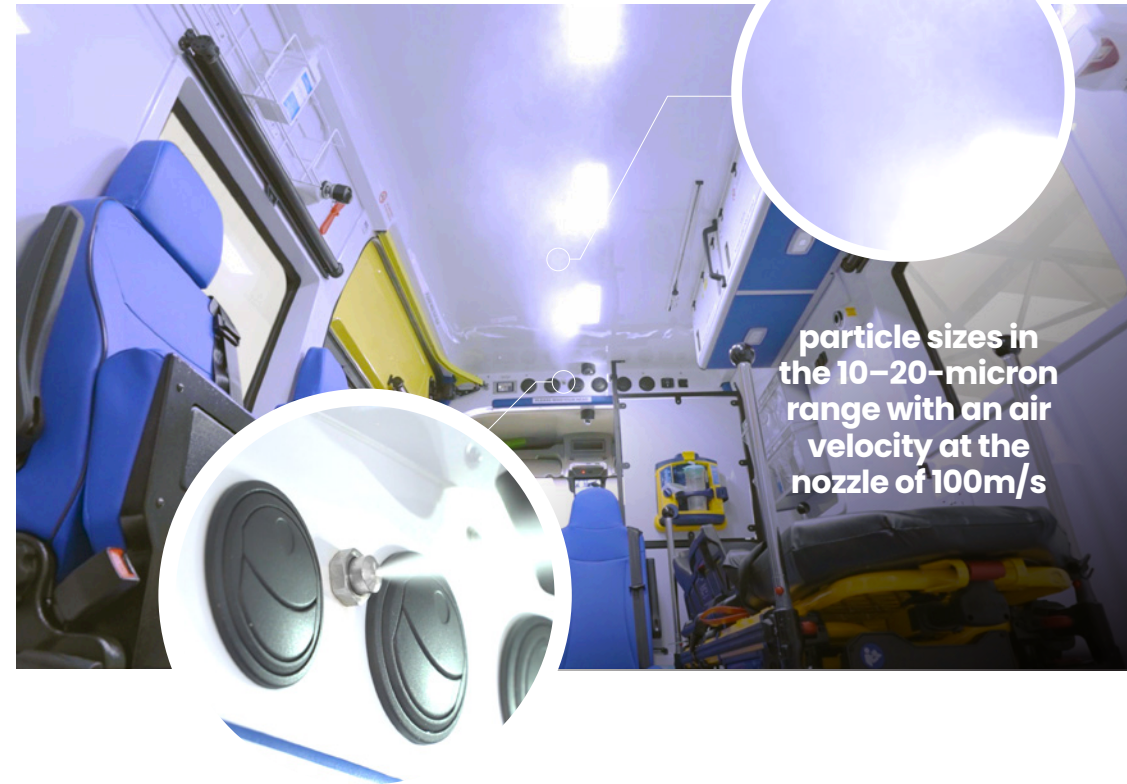

### Features:

- Disinfection time: 5 minutes, effective on surfaces: up to 18 hours
- Retrospectively fitted or comes in a kit for new installs
- Sanitise surfaces & environment without having to return to base
- Custom-designed to fit all ambulance layouts
- Particle sizes in the 10–20-micron range with an air velocity at the nozzle of 100 m/s.

**The Medi9 Air Sanitisation System uses both Medi9 Air Sanitisation Solution and compressed air to create a vapour-like fog. The vapour is finely atomised and circulated in a vortex for optimum coverage. It begins by deactivating any airborne viruses or bacteria present before forming a layer on all horizontal or vertical surfaces.**

The decontamination process is automatic and safe, with built-in safety features such as the cab's portable key and stop button on the remote. It is a simple but effective system, optimising the time the vehicle and crew remain fully operational. Our system can be provided as a kit for ambulance installers or fitted by our team on-site, and it comes with a year's warranty and service as standard.

Medi9 is clinically proven and non-corrosive. It is a highly effective infection control technique that leaves no liquid build-up or residue, making it more time efficient and safer than other disinfectants. As Medi9 is positively charged, it can provide residual protection of up to 18 hours.

- **A precision nozzle provides a fine but powerful mist.**
- **Positioned at the optimum angle to disperse product evenly for the best coverage.**
- **No liquid residue, leaks, or wastage of product.**

 Watch it in action

Scan the QR to watch our Medi9 Air Sanitisation System in use

## System operation.

Operation is simple. No need to set timers, our system has been pre-determined for maximum effectiveness.

Everything is automatic, press the start button and wait for the decontamination process to finish.

## Streamlined design.

Our system is purposely designed and installed to be as unobtrusive as possible. We are consciously striving towards streamlining and providing a sanitisation solution that is powerful but intended to fit in.

## 360° circulation.

Two precision air jets are strategically positioned inside the ambulance load space, creating a vortex that distributes product evenly and effectively.

## Custom Built

Most of our components are designed, printed, and built in-house, allowing us to facilitate retrospective or new installs, whatever the layout of the ambulance. We aim to see each ambulance as a new challenge and problem-solve with ease due to our ability to customise and create bespoke designs.

## Medi9 Air Sanitisation Solution

Medi9 Air Sanitisation Solution is designed and manufactured for use in our Medi9 Sanitisation Systems. This high-performance solution is independently proven effective against 99.9% of bacteria, spores, viruses, and fungi including Coronavirus, Clostridium Difficile, MRSA and Norovirus.

Use Medi9 regularly and effectively in areas where the transfer of germs is a concern to maintain and uphold a safe working environment. With instant germ protection, Medi9 ensures all working areas have been thoroughly sanitised - providing the ultimate solution to the decontamination process.

### Features:

- RTU - ready to use - very important to avoid human error and water contamination
- Fogger - no need to rinse or wipe down after application
- Provides residual protection - use as prevention as well as cure
- Fragrance-free
- Non-hazardous
- Alcohol, chlorine and triclosan-free
- Safe to use in challenging environments and on sensitive equipment
- REACH and COSHH exempt

# Sanitised Spaces Vehicle Sanitisation System [12v & 24v]

**Product codes**

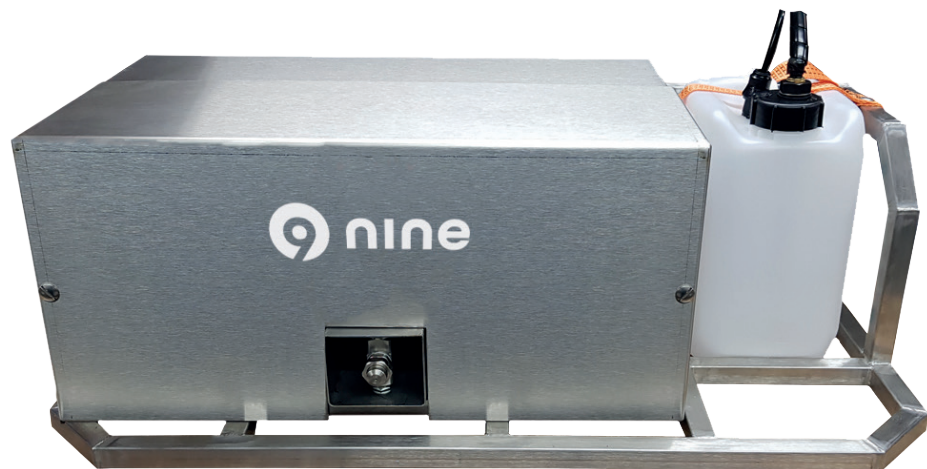

ME908002-12v  
ME908002-24v  
ME901012

**Product**

Equipment  
Equipment  
Solution

**Features:**

- Disinfection: 5 minutes approximately
- 12 months warranty on parts, providing the system has been serviced within the first 6 months to ensure correct usage of the system
- Medi9 required for the Vehicle Sanitiser - 5 litres
- Service recommended every 12 months. For heavily used systems a period of 6 months is recommended

All Nine Group Sanitisation Systems have the smallest possible nozzle opening to produce the optimum air pressure, which counters gravity and ensures the longest possible time to be airborne. When landed on a surface, Medi9 provides up to 18 hours of residual protection, and, as it is positively charged, is attracted to all horizontal and vertical surfaces. The Medi9 Vehicle Sanitisation System generates a force of air which transports finely atomised Medi9 Vehicle Sanitising Solution across large areas on to surfaces and equipment.

The Medi9 solution settles on surfaces killing 99.9% of bacteria, spores, viruses and fungi on contact including Clostridium difficile, MRSA, Ebola, TB and Norovirus. Medi9, whilst highly effective is non-corrosive, which means it is easier and a lot more time efficient to use.

The Medi9 Vehicle Sanitisation System comes in a robust stainless-steel case and is specifically designed for vehicles which do not require compressed air. It enables vehicle decontamination whilst the vehicle is stationary or in transit. It is used in a wide range of vans and vehicles, including but not limited to those transporting critical loads in line with CFPP 01-04, HTM0104 and BS EN 14065 requirements.

### What is Uni9?

Uni9 products have been specifically designed to meet the everyday cleaning requirements that arise in environments such as dentists' and doctors' surgeries, nursing homes and schools – those that have a constant need for highly effective products to meet the need for high hygiene levels.

It's all-purpose formula means that it can be used as an all-in-one cleaner – a cleaner that doesn't stop at anything yet is kind on the skin. The strength yet adaptability of it not only makes it a powerful domestic spray for cleaning anything from cups to cars but also an everyday sanitiser for your business as a simple spray-on and wipe-off formula for those cleaning needs – be they small or large – that arise throughout your working day.

Uni9 offers the most comprehensive portfolio of cleaners, degreasers and sanitisers in the market, ranging from sprays and foam cleaners to wipes and hand dispensers.

We are proud to say all of our Uni9 products are manufactured in the UK. Allowing us to reduce our carbon foot print and maintain a high level quality product.

# Degreaser & Disinfectant Spray Cleaner

Product code	Quantity
UN911002	750ml

**Features:**

- Fragrance free
- Safe to use in all areas
- Degreases & cleans in one application

**Uni9's Universal Cleaner is a remarkable cleaning product, acting as a powerful bactericidal cleaner, degreaser, disinfectant and deodoriser in one single action.**

Uni9's Universal Cleaner has industrial strength cleaning power, digging out tough grease and grime. It's an exceptional 'all-in-one product' for all types of maintenance, deep cleaning and disinfection - killing all known germs including MRSA, E.Coli, Salmonella, Pseudomonas, Staphylococcus, Enterococcus, Listeria, Legionella & many others.

Successfully removes and cleans silicone, sealant, paint, adhesive, bitumen, oil, grease, inks, expanding foam, body fluids, road film, stains, vinyls, plastics, chrome, engines, fibreglass, rubber, synthetic fabrics, plaster, enamel, tools, stainless steel and fungi. Some surfaces are inherently sensitive to alkaline cleaners; always test on an inconspicuous area first. Do not use on wool, leather or weathered surfaces.

**AdBlue®**  
 Diesel Exhaust Fluid

Product codes	Quantity
UN934200	200L
UN934020	20L
UN934005	5L

**Uni9 AdBlue is a high purity chemically produced carbamide solution dissolved in a high purity de-ionised water.**

Uni9 AdBlue is a consumable for diesel-engined vehicles worldwide, and is injected into the SCR catalyst to break down soot and unburnt fuel into water and nitrogen. Both elements are harmless once they exit the exhaust system of the vehicles that generated them. The liquid is 32.5% urea and 67.5 deionized water.
