About Us

We are founded on the belief that life matters and that there are always ways to make life better. Every day, everywhere, we strive to meet this aim by making a positive difference to people's lives.

At Nine Group, we aim to be a beacon and make an impact at scale. From the outset, we harness our diverse skills and in collaboration with our customers and experts relentlessly look to expand what is possible, effective and can be clinically proven, when it comes to infection control and management.

From inception to delivery we are committed to delivering the most progressive and valuable solutions, in a way and at a time that our customers want, underpinned by simple and clear facts so our people can make informed decisions.

**Together—
We Make Life Better.**

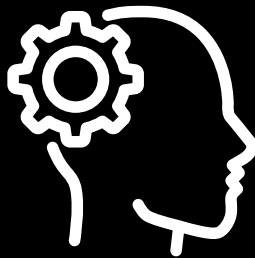

How we work

The process which sets us apart & forms great, long lasting, partnerships with our clients.

Contact:

Contact with our clients is either made proactively or reactively. We want to see how we can help make making your day-to-day life easier, by solving problems & challenges.

Understanding Our Clients:

We like to fully understand your requirements in detail and discuss your challenges to offer tailored solutions providing as much value to you as possible. We are not just another supplier; we like to form long lasting partnerships.

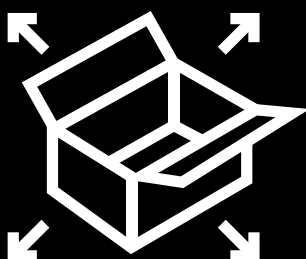

Supporting Clients:

Supporting you in every way to provide a great solution or solve a problem is what drives us each day to make a difference and set us apart.

Order Placed:

Once orders are placed, your client care executive, goes above and beyond to ensure this is processed, picked, packed and dispatched as quickly and efficiently as possible.

Delivery:

Your order is delivered fast, using sustainable packaging options. For example, using our recycled plastic, re-usable totes reduces the amount of cardboard you have to discard and we have to use as an organisation. Our own delivery vehicles offer real-time tracking and a detailed proof of delivery.

Follow Up:

We are obsessed with follow up, to constantly get feedback and ensure your 110% satisfied with the service and care your receiving. Regularly keeping in touch ensures we can help and support with any new challenges or problems which may arise.

Our Four Pillar Partnership Methodology

Pillars are the support that holds up any building, but they are also the support that holds up a company. Like with construction, the pillars of a company must be strong, effective, and beneficial to every aspect of the business.

We at Nine Group have identified four pillars that we believe are the most important and vital in supporting your company and services. They are innovative products, sustainability, logistics/operations, and an all-in-one solution.

All-In-One Solution

Along with our Medi9 range being an all-in-one infection control solution, Nine Group itself is, in fact, the same. We are dedicated to providing everything needed in terms of medical consumables, equipment, infection control, decontamination systems, furniture, PPE, cleaning, janitorial and patient care to name a few.

Along with being more sustainable, an all-in-one solution saves you time and money through eliminating the need for multiple suppliers and deliveries.

Innovative Products

We supply and manufacture a wide range of products through a variety of categories and are always looking for what is new, updated, and innovative to help our clients be more efficient in what they do, add value, and bring about cost savings where possible.

Logistics/Operations

Nine Group offer a service to handle all logistics and operations for clients who have large requirements to carry out their day to day services. This reduces our clients' stress of background responsibilities and allows them to focus more on their business while we take care of the rest.

Using robust, reliable supply chains, clients will receive the products when required, on our fleet of vehicles to ensure the product is delivered every time and in good condition.

Sustainability

Companies around the globe are making moves to become more sustainable, and Nine Group are no exception. We have policies and plans in place to become more sustainable in all aspects of the company, which includes fully electrical vehicles as part of our delivery fleet, paper-free offices, and fully recyclable packaging/products where possible.

We have implemented a reusable tote service, which has made amazing progress in reducing the amount of cardboard that requires disposal. The totes are made with 100% recycled plastic and are used in conjunction with our fleet of delivery vehicles, which in turn reduce the number of deliveries a client receives.

Logistics & Tracking

Track POD is a fully automated system which all drivers are trained on and provides a fully detailed Proof of Delivery document to both us and our clients.

This has already been extremely beneficial to all clients that have used our service, and we have received great feedback, especially as our new system allows our clients to provide key codes for driver access out of hours. Then, by providing our photo proof of delivery, you can see that your order has been delivered accurately and safely.

We are looking to further advance this system by allowing clients to log in to the system from their end and track our vehicles within the hour of delivery, so the delivery is entirely trackable for both us and our clients.

We decided to implement this system for a number of reasons, but mainly using feedback from our platinum clients after asking how we could improve to make the delivery process easier for them. Also, in our bid to become more sustainable, the system allows us to take a further step to becoming a paperless company, something we are working towards in the next 5 years.

With the Track POD system, our Logistics team now have full control over the route planning of each

delivery vehicle within our fleet. This, again, enables us to plan the routes more efficiently to help in sustainability. Our drivers are directly employed by Nine Group enabling us to carry out various required checks to guarantee great client care.

The proof of delivery document is sent to both the client and us in PDF form via email, which is, like most of our systems, customisable to the client's needs and requirements.

Features:

- Our clients' order reference number
- Quantity of Packages
- All line items that are in the delivery
- Weight of delivery
- Name of driver
- Time and date of delivery
- Photo proof of delivery
- Name and signature of signatory
- Delivery vehicle registration

Track-POD Proof of Delivery

Make Ready / IPC Areas

The complete in-house service for transforming your work place area's into a safe, bespoke designed & built.

From Survey:

This initial step can be done by either sending us the dimensions using our Survey form, along with additional photographs of the area or by site visit to your premises and carrying out a site survey.

The visual:

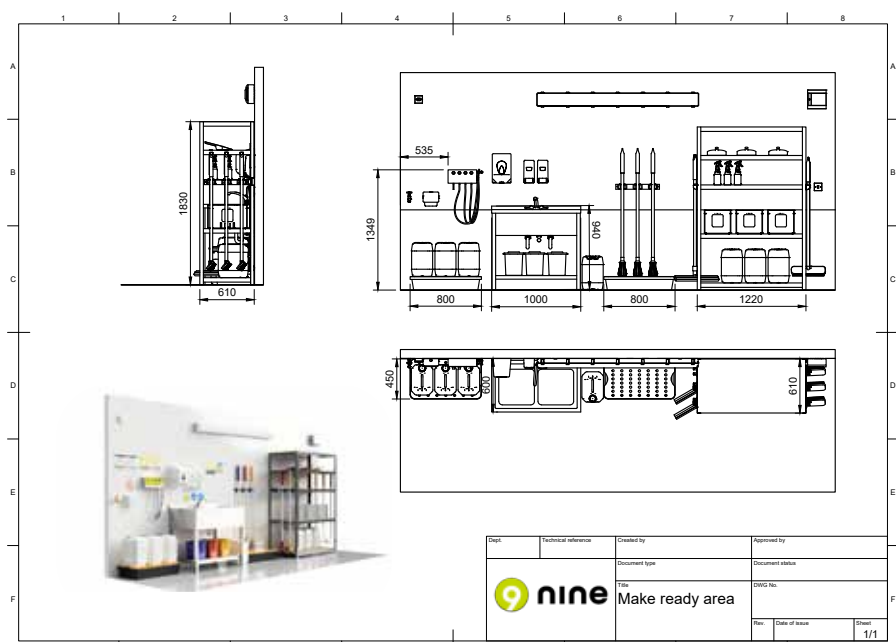

Once the dimensions / site survey is complete and we have discussed what your requirements are, we will produce a full CAD design and rendering showing you your new Make Ready / IPC Area. At this point you will be able to make alterations to the design.

Reality:

Once the CAD design / rendering, equipment & wall artwork have all been approved and signed off, our team will then transform the specified area into your new Make Ready / IPC Area.

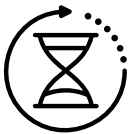

Features:

- Making sure everything you require is in one safe place
- Customisable to your requirements
- Wall Artwork / Signage
- Fully plumbed & ready to go
- Storage systems
- Fully Equipped & Stocked

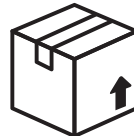

Additional Services

We pride ourselves in making a positive difference to people's lives. From inception to delivery we are committed to delivering the most progressive and valuable solutions to you the customer.

24/7 In-House Nine Group Delivery Service

We have expanded our in-house delivery team and fleet to enable a 24/7 direct, fast, and secure delivery service to mobile and static sites with our own vehicles and drivers for our platinum customers.

Base / Healthcare Establishment in a Box

Our easy All-In-One Complete Kit offers one complete delivery of everything required to kit-out a space, whether it is a new medical room, a clinic, a mobile base upgrade or simply a complete restock.

Site Audits

We offer site audits and consultations to help our clients achieve and maintain clean and healthy environments in the most effective way.

Service and Maintenance

We set high standards and all our equipment comes with a standard 12-month warranty. In addition, we offer service and warranty extensions as well as packaged, ad-hoc and emergency services. Our in-house team of technicians and engineers do this 24hrs, 7 days a week, 365 days a year.

Trials and Testing

All our products have been extensively tested and we have a significant trial and testing data, which are available upon request. We appreciate that at times you may want to conduct your own testing and trials and we collaborate with our customers to facilitate their own in-house testing, if and when desired.

Stock Holding

We have significant in-house stock holding capabilities at our Head office to allow for rapid dispatch of critical items on behalf of our main clients and also offer additional flexible ad-hoc local warehouse and stock holding options and services at client sites.

Product Development

In collaboration with our customers and experts, we relentlessly look to expand what is possible, effective, and can be clinically proven, when it comes to infection control and management. We are analytical and constantly ask ourselves is there something new or better, which would considerably improve today's options and work extensively with our clients on product development.

Product Training

We provide online, virtual and in person product training to run through choices and best practice

Rethinking cleaning for the environment

Reducing production and transport emissions, using recycled raw materials and production processes free of harmful substances are just some of the steps that can be taken to reduce the environmental impacts of cleaning.

Similarly, designing products that reduce the waste of resources such as water, chemicals and energy also reduces impact and running costs. TTS is committed every day to create solutions that make cleaning more effective and efficient, without damaging environment and health.

Recycled Plastic

Environmental responsibility has always influenced TTS's choices, also with regard to raw materials: TTS products feature components made of recycled plastic, certified Second Life Plastic (PSV) by the Institute for the Promotion of Recycling Plastics (IPPR).

Unlike simple self-declarations, PSV certification applies the international ISO 14021 regulation for calculating recycled content, ensuring the quality of recycled plastics and their traceability according to EN 15343. In addition, it involves periodic surveillance by the Certification Authority to ensure compliance over time with the requirements or the maintenance of the mark.

- ✓ **Products with PSV-certified components**
- ✓ **Systems designed to save water**
- ✓ **Production and use of clean energy**
- ✓ **EU Ecolabel certified textiles and trolleys**
- ✓ **Repairable products**

TTS Tri Wet 1 Mop

Double-sided mop, highly absorbent, suitable for smooth surfaces washing or drying. Flat mop system with double sided frame, to be used with pre-soaking, soaking on demand with soaking station or with the convenient wringer. Ideal for recurring washing of smooth surfaces.

Compatible Frame – See page 43

Mops with personalised branding options available.

Features:

- Time-saving: you double the cleaned surface thanks to the flat mops with two cleaning sides
- Easy: mop changing is easy and quick
- Highest hygiene: microfibre penetrates into the microporosity of the floor, collecting dirt and more than 95% of bacteria
- Touch-free: the detaching system avoids any contact with the dirt
- If used with the pre-soaking system, you cut the quantity of necessary mops in half thanks to the two cleaning sides
- If used with the wringer, you go back to the bucket to rinse and wring out the mop half the times as the two cleaning sides of the mop, doubling the dirt collection power

TTS Dosely [Fluid Tank – EPDM Seals]

Dosing device for on-demand mop soaking, including one adhesive labels set (1 red + 1 blue).

Soaking station for single mop soaking directly on the trolley. Ideal for any environment that wants the benefits of pre-soaking without the burden of management.

Compatible Trolleys – See pages 20 to 28

Features:

- Multipurpose: designed to manage two different degrees of risk and relative detergents
- Total control: reduces subjectivity of the operator allowing total control of the dosage
- Effective: the cleaning solution is protected in a hermetic tank that keeps intact the active ingredients of the chemical
- Versatile: allows you to adapt the moistness of the mop to the size of the area to be cleaned and the type of floor
- Intuitive: designed highlighting areas of interaction to reduce training time
- Mechanic: it does not contain electrical parts, minimizing consumption, maintenance and environmental impact during disposal

Wet2Go Disposable Multi Mop

With our Multi mop one can clean a floor of about 20m2 with just one mop. It is hygienic (no cross contamination), time-saving and easy. Due to the microfibre based open structure of the cleaning layer, the dirt gets soaked up into the mop and the surface remains clean and streak free. The advanced barrier film creates a hygienic barricade between the dirt and the frame to which the mop is attached.

Compatible Frame – See page 43

Features:

- Removes >99% of microorganisms with the use of only water (certified according EN 16615:2015)
- Convenient (no washing, easy preparation, less logistics)
- Constant performance (each time new mop)
- 13 gram = 20m2 cleaning
- Money-saving (lightweight mop, no washing costs, less transport)
- Eco-friendly (no washing, less transport)
- No detergent required

Wet2Go Disposable Multi Mop – 42x13cm – Pack of 20

Qty:

NG	11040464-05	Pack of 20
NHSSC	MKB85241	

Wet2Go Disposable Disinfect Mop

In disinfection, preventing cross-contamination is crucial. Our disposable disinfect mops are designed to capture bacteria and viruses within the mop. These are then disposed of, which effectively reduces the risk of cross-contamination to zero. Thanks to the advanced and highly absorbent layer, one disposable mop can cover approximately 30m²

Compatible Frame - See page 43

Features:

- Absorption >180ml which equals > 30m² capacity per mop
- Convenient (no washing, easy preparation, less logistics)
- Slow discharge of the liquid
- Hygienic and constant performance (each time new mop)
- Money-saving (no washing costs, less transport)
- Eco-friendly (no washing, less transport)

Wet2Go Disposable Disinfect Mop - 42x13cm - Pack of 5

SKU:

Qty:

NG **11040465-05**
NHSSC **MKB85275**

Pack of 5

Wet2Go Disposable Spill Absorbing Mop

Cleaning large pools of liquid can be challenging because accidents often happen when cleaning staff aren't around. The design of the mop makes it convenient because you can easily dispose of both the mop and the captured dirt after use. This reduces the risk of cross-contamination almost entirely. By using a new mop for each spill, you ensure a hygienic and consistent performance with every cleaning task.

Compatible Frame - See page 43

Features:

- Absorption >250ml per mop
- Convenient (no washing, easy preparation, less logistics)
- Hygienic and constant performance (each time new mop)
- Money-saving (no washing costs, less transport)
- Eco-friendly (no washing, less transport)

Wet2Go Ready Care Disposable Pre-Soaked Flat Mop

The state-of-the-art cleaning wipe for professional usage. Cleaning has never been easier, faster, and more professional. This pre-wetted solution can be instantly used. Bulkier than most other disposable wipes, the Ready cloth is very comfortable to hold and has a great hand touch. Due to the unique composition the WET2GO Ready cloth does not leave any residue on surfaces, the liquid decomposes in just water and oxygen, which are both not harmful for the environment.

Compatible Frame - See page 43

Features:

- 100% convenient (no washing, no preparation, less logistics)
- Ready to use = failure free
- Maximum dirt removal: 99.9% microorganism removal
- Up to 40% time saving compared to traditional mops
- 1 mop can be used to clean 20m2
- Zero residue cleaning, 100% biodegradable cleaning liquid
- Eco-friendly (no washing, less transport, reduced waste water disposal)
- Money-saving (less labour, no washing costs, less transport)
- State of the art dispenser packaging

“

Maurice Madeo,
Deputy Director Infection
Prevention and Control.

Northern Lincolnshire
and Goole
NHS Foundation Trust

The decision was taken by NLAG to look at the cleaning processes & procedures [after] identifying that the trust was using significant quantities of chlorine-based disinfectants daily, and was of detriment to patients, staff, and the environment. Consultation with Facilities resulted in Nine Group being invited to present alternative products for evaluation.

NLAG was using a variety of different standard and chlorine-based cleaning products daily. Following a trial period, the decision was made to roll out Medi9 & Uni9 products across all three NLAG hospitals.

The usage of products [was] reduced by 50% ...and a reduction in the number of requests for deep cleans by nearly 15%.

The six months after implementation of Medi9 & Uni9 usage has produced positive feedback from patients and staff.

In addition, it has helped the Trust achieve a 30% reduction in the number of C.Difficile cases, [and] are pleased to report that we've not had to close an entire ward due to viral...outbreaks for twelve months.

TTS Action Pro Tec & Double 30L Bucket Combo Mopping Unit

Double bucket with two drain-plugs and Tec wringer, plain coloured, 80° mm wheels. Professional jaw wringer. Ideal for cleaning medium-large areas where it is necessary to rinse the mop.

Compatible with flaps, pockets system and mops.

- Features:**
- Highest hygiene: rinsing water is always clean thanks to the back drain-plug that allows emptying the bucket when necessary
 - Effective: separation of cleaning solution from rinsing water allows a better cleaning result, less waste of water and chemical
 - Ergonomic: the drain-plugs allow emptying the bucket without lifting and higher than the traditional buckets to allow the operator to work while standing
 - Easy to maintain: the smooth surfaces and the absence of cavities facilitate cleaning and guarantee a high level of hygiene
 - Handy: double handle to carry it easily

Uni9 Fast & Effective Floor & Hard Surface Cleaner

Uni9's Floor & Hard Surface Cleaner has a wide range of cleaning qualities, meaning that it can be used on a wide range of hard surfaces to give an excellent finish from either buffing or mopping.

Our Floor & Hard Surface Cleaner completes a number of tasks with one process, it will clean, deodorise and kill bacteria in one application. It has been produced fragrance-free or with a pleasant lemon aroma to complement the finished area. With a dilution rate of 1:15, Uni9's Floor & Hard Surface Cleaner is not only an efficient hard surface cleaner but also a cost effective solution for all hard surface cleaning applications. Suitable for auto dosing systems.

Features:

- Antibacterial properties
- Cleans, disinfects and deodorises in one application
- Water rinsable
- Chlorine free

Uni9 Clean & Disinfect Multi Purpose Cleaner

Uni9's Multi Purpose Cleaner is a remarkable cleaning product, acting as a powerful bactericidal cleaner, degreaser, disinfectant and deodoriser in one single action.

Our Cleaner has industrial strength cleaning power, digging out tough grease and grime. It's an exceptional 'all-in-one product' for all types of maintenance, deep cleaning and disinfection - killing all known germs including MRSA, E.Coli, Salmonella, Pseudomonas, Staphylococcus, Enterococcus, Listeria, Legionella & many others.

Successfully removes and cleans silicone, sealant, paint, adhesive, bitumen, oil, grease, inks, expanding foam, body fluids, road film, stains, vinyls, plastics, chrome, engines, fibreglass, rubber, synthetic fabrics, plaster, enamel, tools, stainless steel and fungi. Some surfaces are inherently sensitive to alkaline cleaners; always test on an inconspicuous area first. Do not use on wool, leather or weathered surfaces.

Features:

- Powerful odour elimination
- Biodegradable
- Quick & easy to apply
- Leaves areas smelling refreshed

Medi9

Medi9 is a revolutionary range of infection control products that provide alcohol and chlorine free hand and surface germ protection solutions. Our entire range is tested independently, and proven effective against bacteria, spores, viruses, and fungi upon contact, including Clostridium Difficile, MRSA, Norovirus, Swine Flu and Coronavirus.

Medi9 is used in multiple healthcare facilities, including NHS trusts, ambulance services, schools, and commercial sectors. It is a unique, highly effective solution to sanitisation without the introduction of harsh chemicals such as alcohol or chlorine. Nine Group produce a large range of products in the Medi9 portfolio to ensure complete coverage of any infection control requirement.

Medi9 provides piece of mind. It comes ready to use (RTU), so you can simply grab and go and this minimises human error. Clinically proven results. Every time. Everywhere.

We are constantly researching and developing new environmentally innovative products for the Medi9 range. Medi9 products are manufactured in the UK, allowing us to reduce our carbon foot print and maintaining high quality products.

How effective is it?

Medi9 is a 'Beyond the Quat' fourth generation biocide technology which works by physically damaging the bacteria or cell. It consists of a polymer and biocidal agent that helps it penetrate and deactivate viral cells.

Medi9 Personal Health Protection Kit

Medi9 Personal Health Protection Kits have been designed as infection control kits to protect anyone who is working in an area where there is a high risk of infection or contamination – for example, those handling patients that have contracted Ebola, swine flu, Norovirus and the like.

They can also be used at crime scenes and as protection for front line personnel attending a disaster scenario. The kits are packaged compactly in a securely sealed bag and designed so that the contents, once used, can be contained in a clinical waste bag, cable-tied and sent away for disposal.

Features:

- *Coverall provides protection against airborne particles and fibres. Zip front with adhesive backed cover flap. Certified to EN13982-1, EN13034, EN14126, EN1073-2 & EN1149-5
- **Goggles are lightweight, extremely durable and, with an indirect vent
- Provides protection from liquid splashes as well as large dust particles. Certified to EN166:2001
- All items can be disposed of in clinical waste sack provided
- Bespoke kits can be assembled to your requirements

Kit Content:

- 1 x Coverall*
- 4 x Universal Wipes (2 x per sachet of 2)
- 2 x Pair of Large Gloves
- 1 x Disposable Apron
- 1 x Clinical Waste Sack
- 1 x Cable Tie
- 1 x Pair of Overshoes
- 1 x Pair of Oversleeves
- 1 x FFP3 Disposable Face Mask
- 1 x Pair of Goggles**
- 1 x 30ml Medi9 Surface Spray
- 1 x Instruction Sheet

Medi9 Sanitised Personal Hand Foam

Medi9 alcohol free Hand Sanitising Foam provides rapid, long lasting disinfection and biological cleanliness to all hard working hands. The high performance formulation coats the skin with a monomolecular layer that continues providing protection long after the initial application. Regular use ensures sustained broad spectrum pathogen protection.

Medi9 Hand Sanitising Foam is suitable for use in high traffic locations where soap and water are not available or in areas where a higher level of hand sanitisation is required. Wall brackets and bed brackets which allow the product to be hung in readily accessible areas are also available.

Features:

- RTU (Ready To Use)
- Apply, rub and go - no need to rinse off
- Provides residual protection
- Use for prevention and for cure
- Fragrance free
- Safe for use in food preparation areas
- Alcohol, chlorine and triclosan free
- Non-hazardous - safe for use in the vicinity of vulnerable people and children
- Safe to use in challenging environments and on sensitive equipment
- REACH and COSHH exempt

Medi9 Sanitised Spaces Sanitisation Units

The Medi9 sanitiser units have been specifically designed by Nine Group for speed of use .

The units can be carried to any area that requires high-level disinfection using our Medi9 solution. This Medi9 units can be used in a range of different environments - spanning from small areas to large and even outdoor areas. It is powerful and very effective tool to prevent infections and the spread of bacteria and viruses. It is a truly unique sanitisation solution. It is suitable for use in a wide range of environments.*

*Hospitals, health centres, medical clinics, doctor surgeries, dentists, veterinary surgeries, nursing homes, schools, offices, vehicles (including ambulances), public transport, gyms, hospitality etc.

Features:

- Unique automatic air pressure control system ensures the fluid does not leak from spray head during use.
- Quick & simple to operate; minimal training required.
- Compact and lightweight.
- As it is a portable unit you can adjust the angle of spray to ensure total coverage of the area - even places that are difficult to reach.
- Unit comes supplied with a charging lead.

Medi9 Sanitised Spaces Vehicle Sanitisation System [12v & 24v]

All Nine Group Sanitisation Systems have the smallest possible nozzle opening to produce the optimum air pressure, which counters gravity and ensures the longest possible time to be airborne. When landed on a surface, Medi9 provides up to 18 hours of residual protection, and, as it is positively charged, is attracted to all horizontal and vertical surfaces. The Medi9 Vehicle Sanitisation System generates a force of air which transports finely atomised Medi9 Vehicle Sanitising Solution across large areas on to surfaces and equipment.

The Medi9 solution settles on surfaces killing 99.9% of bacteria, spores, viruses and fungi on contact including Clostridium difficile, MRSA, Ebola, TB and Norovirus. Medi9, whilst highly effective is non-corrosive, which means it is easier and a lot more time efficient to use. The Medi9 Vehicle Sanitisation System comes in a robust stainless-steel case and is specifically designed for vehicles which do not require compressed air. It enables vehicle decontamination whilst the vehicle is stationary or in transit. It is used in a wide range of vans and vehicles, including but not limited to those transporting critical loads in line with CFPP 01-04, HTM0104 and BS EN 14065 requirements.

Features:

- Disinfection: 5 minutes approximately
- 12 months warranty on parts, providing the system has been serviced within the first 6 months to ensure correct usage of the system
- Medi9 required for the Vehicle Sanitiser – 5 litres
- Service recommended every 12 months. For heavily used systems a period of 6 months is recommended

Medi9 Interior Clean Room HPV Tape

Medi9 HPV Tape is uniquely designed to meet the needs of professional users. The tape has a specialist adhesive which is designed to remove cleanly from internal hard and soft surfaces. Our tape is designed for critical environment adhesion level but good cohesive strength, leaves no residue and is resistant to acids and other chemicals.

Our HPV Tape is ROHS certified and meets COSHH regulations. The tape is manufactured with an embossed pattern which has the benefit of NO marks being left by this technologically advanced product, and tears straight.

The tape has been designed from a specialist flexible Polyvinyl chloride, also known as poly vinyl or vinyl, commonly abbreviated PVC and does not have any ability to breathe, this allows the product to be used in critical applications against water or vapour ingress.

Features:

- Leaves no residue marks
- Easy to Tear, no scissors required
- Designed & manufactured for the NHS for HPV operations
- Advanced innovative channel seal that lock-in specialist adhesive

P-Wave® Easy Fresh Air Freshener Fragrance Cover – Cotton Blossom

The Easy Fresh system comes with low battery and cover change warning lights, and an audible beep, keeping you informed and ensuring timely replacements. Packed with fragrance yet low in Volatile Organic Compounds (VOCs), it is compliant with European standards, further affirming our commitment to a healthier environment. The Easy Fresh system ensures a constant release of fragrance from the recyclable cover, filling the room for a full 30 days. Powered by a light-activated fan, it's engineered to work harder as the cover nears its end-of-life, ensuring a consistent fragrance delivery.

Features:

- Loaded with long-lasting fragrance
- Recyclable where facilities exist
- Ensures constant fragrance, with no peaks and valleys compared to an aerosol
- Low in VOCs (Europe compliant)
- Fan helps to distribute the fragrance around the room, covering up to 25 sq metres
- Intelligent fan powers down when the lights go off to conserve the battery
- Versatile fitment – can be placed on a wall or ceiling and at any height

P-Wave® MyFresh Air Freshener Fragrance Refill – 100% Recyclable – Alpine Forest

MyFresh offers discreet fragrance targeting, freshening your surroundings when and where it's needed the most. Ideal for toilet cubicles, vanity mirrors, lifts, gyms, spas, or even a desk in an office, it provides a better user experience than aerosol alternatives. Its handy LCD screen alerts you when it's time to replace the refill and battery. Plus, you can adjust the fan's frequency settings between "Hi" and "Lo" to suit your preference.

The recyclable, dry fragrance refill promises a cleaner experience with no wet residue. Charcoal filters purify the incoming air for a fresher experience, and the unit operates on a single AA battery, which is included with each refill.

Microfibre Cloth – Supercloth

[10 Sheets 40x40cm]

is most popular knitted microfibre cloth, which is ideal for quick and effective cleaning.

The ultra-fine microfibres capture dirt from most surfaces, are designed to create a very large surface area per fibre and are naturally statically charged so that they have a strong suction effect. In other words, they collect as much dirt as possible in just one wipe, even from the smallest surface crevices.

Features:

- Low linting
- Smear-free finish
- Ultra-fine fibres
- Attracts dust
- Lifts dirt and germs
- Use dry or damp

Site Services Department

We have been using Uni9 Multipurpose Cleaner across various areas within our hospital for several weeks now, and the feedback from our staff has been overwhelmingly positive. Team members have commented on how effective the product is at removing dirt and residue, leaving surfaces clean and fresh with minimal effort.

Staff particularly appreciate its ease of use, and versatility across multiple cleaning tasks within our ward kitchens, which has helped improve efficiency and maintain our high hygiene standards. Overall, Uni9 has proven to be a reliable, high-quality cleaning solution that consistently delivers excellent results.

Uni9 Clean & Disinfect Multi Purpose Cleaner Wipes

Uni9's Multi Purpose Cleaner is a remarkable cleaning product, acting as a powerful bactericidal cleaner, degreaser, disinfectant and deodoriser in one single action.

Our Cleaner has industrial strength cleaning power, digging out tough grease and grime. It's an exceptional 'all-in-one product' for all types of maintenance, deep cleaning and disinfection - killing all known germs including MRSA, E.Coli, Salmonella, Pseudomonas, Staphylococcus, Enterococcus, Listeria, Legionella & many others.

Successfully removes and cleans silicone, sealant, paint, adhesive, bitumen, oil, grease, inks, expanding foam, body fluids, road film, stains, vinyls, plastics, chrome, engines, fibreglass, rubber, synthetic fabrics, plaster, enamel, tools, stainless steel and fungi. Some surfaces are inherently sensitive to alkaline cleaners; always test on an inconspicuous area first. Do not use on wool, leather or weathered surfaces.

Features:

- Kills microbes: Bactericidal, Viricidal, Yeastocidal, Fungicidal
- Fragrance free
- Safe to use in all areas
- Degreases & cleans in one application

“

Paul Norris
Operational Service Lead
Basingstoke Hospital NHS Trust

Hampshire Hospitals
NHS Foundation Trust

We have been working closely with Nine Group to bring new products & cleaning materials into the trust. [We] have found them to be a very professional company when we have had issues around our stock levels. They have worked tirelessly to provide us with their products, to the point of driving up from Cornwall with products in their car in the late evening.

We currently use Nine Group's Medi9 wipes and their floor cleaning products. During the current pandemic we have also been using their fogging machines to great effect.

We have been working very closely with the Nine group to bring new products and cleaning materials into our NHS trust. They are always innovating and sharing new technology with us. It is a great working relationship.

Medi9 Superabsorb Spill Granules / Clean-up Powder

Watch in
action

ninegrp.com/video-hub-medi9

Medi9 Superabsorb is a superabsorbent polymer specifically engineered for absorption and retention of fluids associated with the healthcare industry.

Medi9 Superabsorb is a swellable, in-soluble, cross-linked polymer, packaged as a white, granular product in its dry form. Upon contact with fluids, a gel is formed. The resulting gel, with excellent mechanical stability, retains these fluids well, even under stress, since the absorption is based on a physical-chemical process.

Features:

- Safe to use in any environment
- Fragrance free / No odour
- Suitable for all body fluids
- Simply apply to body fluid, allow to gel and then dispose of via hazardous waste
- Ready to Use (RTU)

Bins

TTS Derby Bin with Pedal Operated Lid 30L [L]

Bin with pedal and lid, with odour eliminating cartridge box and bag tightener. Colour coded lids ideal for separate waste collection. We recommend 70x40cm garbage bags in the 30L version and 50x60cm standard bags in the version with 2x15L insert. In compliance with the H.A.C.C.P. regulation, that require bins avoiding any contact with the hands and are easy to clean and disinfect.

Features:

- Hygienic: thanks to the pedal, it can be used without any hand contact
- Anti-odour: lid provided with odour eliminating cartridge box
- Efficient: 2x15L insert to set up practical departments, in which different types of waste can be disposed of, encouraging its recycling
- Ideal to create zones of separate waste collection thanks to the colour-coded lids

Vehicle

AdBlue® Diesel Exhaust Fluid

AdBlue is a high purity chemically produced carbamide solution dissolved in a high purity de-ionised water. AdBlue is a consumable for diesel-engined vehicles worldwide, and is injected into the SCR catalyst to break down soot and unburnt fuel into water and nitrogen. Both elements are harmless once they exit the exhaust system of the vehicles that generated them. The liquid is 32.5% urea and 67.5 deionized water.

Uni9 Fast & Effective Traffic Film Remover

Uni9's Traffic Film Remover is a commercial grade traffic film remover, powerful enough to remove the most stubborn of dirt without damaging paintwork and decals. No wax additives mean that the glass screens remain clear and non-reflective, inbuilt polymers provide an extra sheen to the vehicle finish. Readily biodegradable the Uni9 TFR will leave your vehicle clean, shiny and streak free.

Features:

- Powerful Cleaning
- Water Rinsable
- Biodegradable

Simpler Recycling Solutions

The UK government has introduced the 'Simpler Recycling' waste reforms to streamline recycling for households and businesses in England.

This initiative aims to create a more consistent recycling system, ensuring that people can recycle the same materials at home and in the workplace. By standardising waste collections, the scheme seeks to reduce confusion about what can be recycled, ultimately improving recycling rates and benefiting the environment.

Impact on you

Under the Simpler Recycling scheme, businesses, schools, hospitals, and other non-household municipal premises in England must separate dry recycling. Such as paper, card, plastic packaging, glass, and metal—from general waste for collection. Additionally, any business that produces food waste, regardless of the quantity, must also separate it for collection.

Sizes

Range of 15 to 50 litre systems specifically designed to make waste separation easier and more effective.

Coloured lids

Colour-coded bins are ideal for creating dedicated waste collection areas: the coloured lids make it possible to differentiate between different types of waste, facilitating collection. White, red, blue, green, yellow and brown: combine the colour options to differentiate waste collection, creating efficient and always neat areas.

Inserts

2 or 3 compartment configurations: whatever the need, inserts increase the collection possibilities by giving each waste stream the right location. Easy to apply, remove and clean, they make it possible to create practical separation in which different types of waste can be collected, promoting recycling.

See pages 201 to 211

Uni9 Fast & Effective Floor & Hard Surface Cleaner

Uni9's Floor & Hard Surface Cleaner has a wide range of cleaning qualities, meaning that it can be used on a wide range of hard surfaces to give an excellent finish from either buffing or mopping.

Uni9's Floor & Hard Surface Cleaner completes a number of tasks with one process, it will clean, deodorise and kill bacteria in one application. It has been produced fragrance-free or with a pleasant lemon aroma to complement the finished area. With a dilution rate of 1:15, Uni9's Floor & Hard Surface Cleaner is not only an efficient hard surface cleaner but also a cost effective solution for all hard surface cleaning applications. Suitable for auto dosing systems.

Features:

- Antibacterial properties
- Cleans, disinfects and deodorises in one application
- Water rinsable
- Chlorine free

Uni9 Fast & Effective All Season Screen Wash

Uni9's Universal 'All Season' Screen Wash Cleaner has been manufactured for high use commercial applications. It is designed to be anti-smear and is the preferred choice for many motorists.

Suitable for use all year-round, dilute 1:5 and the antifreeze ingredient will keep the screen wash effective to -5, for harsh winter conditions, use neat in areas, locations where temperatures are expected to reach -15. Formulated to effectively remove insect smear, salt and road film. Does not damage wiper blades, rubber seals and does not cause light reflection.

Features:

- Anti-Smear
- Powerful Cleaning
- Fragranced
- Biodegradable
